Re: Doctors' Day 2022

Dear Physicians,

Happy Doctors' Day 2022. The significance of this special day is more meaningful this year with the passing of two years since the COVID-19 global health crisis began. Colleagues and leaders throughout Trinity Health recognize and celebrate the commitment, sacrifices and extraordinary care you've provided throughout the pandemic.

Over the last two years, you moved fast to implement new processes and procedures, sacrificed time with your families, supported our clinical teams and one another and vaccinated as many people as possible. You've been impactful leaders in Trinity Health and the communities we serve.

As we move from pandemic to endemic, continued partnership and physician leadership remains critical to our success as an organization. We are grateful not only for the excellent care you provide, but also the leadership of the thousands of physicians participating in training of residents and fellows, leading our clinically integrated networks in delivering triple aim care, developing leading practices through our clinical framework and TogetherCare journeys and physician governance and leadership of our medical groups. We are sincerely grateful for all you do and want to continue to partner with you as we move into this next phase of healthcare delivery.

This day and every day, please know how appreciated you are and how important you are to our future, together. Thank you for everything you've done and continue to do to serve our Mission and be a healing presence in our communities.
