

Tenth Annual 2022 Research & Evidence-Based Practice Day

A collaboration of Mount Carmel Graduate Medical Education
and Mount Carmel College of Nursing

WebEx Link: <https://trinity-health.webex.com/trinity-health/j.php?MTID=m7981922e01a76c33488399824f725210>

Purpose:

Please join us as resident physicians and pharmacists, College of Nursing faculty and students, and interprofessional colleagues from Mount Carmel Health System present their accomplishments in research, quality improvement and evidence-based practice. Presentations will be both podium and poster format.

Objectives:

- ✦ Discuss research, EBP and quality improvement results and how they may impact patient care.
- ✦ Learn about the process of a research project and how to communicate findings.
- ✦ Review recent clinical research, evidence-based practice, quality and safety projects.

Intended Audience:

Medical staff and resident physicians, advanced practice practitioners, nurses, pharmacists, clinical students, MCHS and Trinity administration and colleagues.

Remember, Research & Evidence-Based Practice Day is:

Knowledge-Building

Interprofessional

Convenient

Kaleidoscopic

KEYNOTE PRESENTERS:

Evidence-Based Practice

Amy O'Brien, DNP, RN

"Teach Back, an evidence-based practice strategy to reduce 30-day stroke readmission rates"

Dr. O'Brien is the Neuroscience Program Manager at Mount Carmel East and St. Ann's. She graduated from Mount Carmel College of Nursing and has impacted process changes that benefit the health and well-being of our patients through evidence-based practice initiatives.

Research

Emina Huang, MD, MBA

"Patient derived questions to answer the relationship between inflammation and cancer"

Dr. Huang is a colon & rectal surgeon and the Doyle L. Sharpe, M.D., Distinguished Chair in Surgical Research at UT Southwestern. She graduated from the MCHS Colon & Rectal Surgery Fellowship.
