

The TogetherCare Production (PRD) environment is the environment where users log into Epic. All live sites currently use the PRD environment for day-to-day patient care and revenue cycle activities. Access to PRD for RHMs that are not live on TogetherCare is very limited and on a need basis only. Certain pre-live activities require users to log into PRD for temporary periods. The timelines below outline when early access to PRD is given and removed.

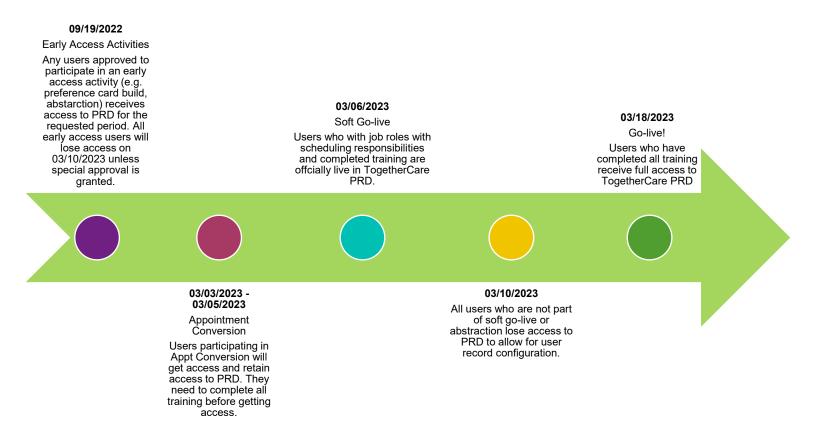

### Providers

Trinity Health

## **Non-Providers**

# Appendix

#### Personalization Lab Job Roles

The following roles will have access limited access in TogetherCare PRD to complete personalization labs. Their access will restrict them from completing patient care functions prior to go-live. Their access will be removed after the last scheduled personalization lab. Any providers that successfully complete all their assigned training will get their full TogetherCare access at go-live.

Job Role	Job Role Group
Acute Bariatric Surgeon	Surgery Physician

### Soft Go-live Roles

The following job roles have been approved to gain early access to TogetherCare PRD as part of the soft golive which occurs about 12 days before go-live. Users with these job roles will be granted access on the day of soft go-live and will not lose access if they successfully complete all their assigned training in HealthStream.
